

How to Utilize Gif's and Visuals in Physical Education

By Round Hill P.E. at the JMU Institute, Summer 2019
 Round Hill P.E. // YouTube: RHEPE // www.RHEPE.com
 Round Hill Elementary; Round Hill, Virginia

In this session you will experience how to utilize visuals in your Physical Education class to maximize your teaching effectiveness, time and the students understanding of the lessons material. We will explore PowerPoint, DMD vClone, PhotoGrid, Loopideo, Video Delay Instant Replay, & Plickers.

When you leave this session you will walk away with an exercise visual that you will have created that you will be able to use during your next Physical Education class.

Scan the above QR code, or go to <http://bit.ly/2Sae22E>, to access the Google Drive with all of this sessions materials. In this drive, you will see templates of all our visuals that you can edit/alter to fit the needs of your students or you can use the videos we use with our students. These videos are also located in the drive, plus you can access them on our YouTube Channel: RHEPE.

We hope you enjoy our session. We hope you can walk away with something to improve your program for your students. Have a great school year. Thank you for coming.
